Results-driven **Senior Business Analyst** with **2+ years** in CFaaS & B2B SaaS, leading a cross-functional team of **9 members (4 BAs + 5 Interns)** via Agile sprint-based delivery. Built production-grade **multi-LLM AI automation tools** (ChatGPT, Claude, Gemini) and a full-stack **B2B Lead Intelligence Platform** managing **30,000+ company records** with Chrome extension, Flask backend, and Apollo.io REST API integration. Delivered consistent business impact through data-driven sales analytics, CRM data governance, automated executive reporting, and competitive market intelligence across multiple client verticals.

Work Experience

Senior Business Analyst

Mar 2026 – Present

Avadhesh.co / Hyderabad, India

Team Leadership & Agile Delivery

- Lead **4 BAs + 5 Interns** (AI, DB, BA) — owning sprint planning, daily task assignment, work review, and performance feedback across multiple concurrent projects.
- Define project scopes, set KPIs, mentor team in SQL, Python, and AI tools; surface top performers for full-time conversion.

AI Integration & Intelligent Automation

- Architected an internal **multi-LLM automation suite** integrating **ChatGPT API, Claude, and Gemini** with task-routing logic for AI-powered report generation and workflow automation.
- Deployed AI-assisted tools measurably enhancing team productivity across competitive research, executive reporting, and BA documentation.

Full-Stack Product Development

- Built a **B2B Lead Intelligence Platform**: Chrome extension (Apollo, LinkedIn, Crunchbase, YourStory, Tracxn), **Flask + SQLite** backend with **30,000+ records**, Apollo.io REST API (industry/city/funding/revenue filters), project-based lead tagging, duplicate detection, bulk ops, Excel export, and real-time dashboard.
- Built company's **data intelligence website** (React.js, Flask, BeautifulSoup, HTML5/CSS3) for automated competitive data collection and lead enrichment.

Business Analyst

Mar 2024 – Feb 2026

Avadhesh.co / Hyderabad, India

Executive Collaboration & Market Intelligence

- Partnered with **CEOs and founders** to translate business objectives into KPI reports, analytical frameworks, and stakeholder roadmaps across multiple client verticals.
- Architected a **Python scraping pipeline** (BeautifulSoup, NumPy, Pandas) extracting competitor pricing, signals, and leads across 10+ verticals — powering weekly GTM strategy briefs.

Analytics, Revenue Growth & Delivery

- SQL and Advanced Excel-driven sales pipeline analysis directly contributed to measurable revenue growth across client accounts; built **Power BI dashboards** consolidating CRM, billing, and support data — significantly reducing manual reporting effort for leadership.
- Led CRM data governance initiative remediating **10,000+ records**; authored **BRD/FRD documentation** for 6+ business initiatives with full stakeholder sign-off; managed end-to-end UAT across 80+ test cases with zero critical production defects.
- Trained and mentored **25+ interns** in SQL, Python, CRM, and market research workflows.

Core Skills

AI & AUTOMATION

ChatGPT API / Claude / Gemini
Multi-LLM Workflow Automation
AI Report Generation
Prompt Engineering

DEVELOPMENT

Python — Flask, BeautifulSoup, Pandas
React.js / HTML5 / CSS3
Chrome Extension Development
REST API Integration
SQLite Database Management

DATA & ANALYTICS

SQL — Advanced, CTEs, Joins
Power BI — Dashboards, DAX
Excel — Pivot, VLOOKUP, VBA
Data Mining & Web Scraping

BUSINESS ANALYSIS

BRD / FRD Documentation
Requirements Elicitation
Stakeholder Management
UAT Planning & Test Management
Gap & Root Cause Analysis
Process Mapping & Optimization

LEADERSHIP & DELIVERY

Team Lead — 9 Members
Agile & Scrum / Sprint Planning
Intern Mentoring (25+)
SOP Creation & Documentation
Cross-functional Collaboration

Key Projects

B2B Lead Intelligence Platform

Avadhesh.co, 2025–2026

Full-stack lead generation system replacing manual Excel workflows. **Chrome extension** scrapes Apollo, LinkedIn, Crunchbase, YourStory, and Tracxn. **Flask + SQLite** backend manages **30,000+ company records**. Apollo.io REST API integrated with advanced filters (industry, city, funding stage, revenue). Features: project-based lead tagging, duplicate detection, bulk ops, auto Excel export, and real-time dashboard.

Multi AI Automation Suite

Avadhesh.co, 2026

Internal AI toolset integrating **ChatGPT API, Claude, and Gemini** for automated report generation and workflow execution. Task-routing logic distributes queries across models by output type, reducing manual effort and accelerating research across the analyst team.

CRM Data Governance & Reporting Suite

Avadhesh.co, 2024

SQL-based anomaly detection and deduplication framework remediating **10,000+ CRM records**, improving data accuracy and pipeline forecasting for leadership. Paired with a centralized **Power BI** dashboard consolidating CRM, billing, and support data into a single real-time KPI view.

Market Intelligence & Lead Scoring Pipeline

Avadhesh.co, 2024

Automated Python pipeline (BeautifulSoup, Pandas, NumPy) collecting competitor pricing and lead data across many websites into structured SQL databases. Integrated a data-driven lead scoring model (SQL + Excel) enabling the sales team to prioritize high-conversion outreach.

Certifications

AWS Cloud Practitioner

Amazon Web Services, 2023

Business Analysis Foundations

IIBA, 2023

SQL for Data Analysis

Seed IT Solution, 2022

Power BI Data Analyst

Udemy, 2023

Achievements

B2B Lead Platform Built

Chrome ext + Flask + SQLite managing 30,000+ records with Apollo.io API integration

Multi-LLM in Production

ChatGPT, Claude & Gemini APIs deployed in internal AI automation suite

Team of 9 Led

4 Business Analysts + 5 Interns via daily Agile sprints & structured delivery

Zero Critical Defects

UAT test cases — defect-free production go-live

Education

B.Tech — Mechanical Engineering

CSVТУ Bhilai | 2017 – 2021

Post-Graduate Upskilling

Business Analysis, SQL, Python, Data Analytics & AWS — 2022–23
